Experience

Full Stack Developer

2018 - Present

Restful Brilliance - Remote

Worked extensively with complex Elastic Search solutions. Advising clients on and developing with EPiServer CMS, EPiServer Search, and EPiServer Find. Creating eCommerce checkout flows in Vue.js with EPiServer Commerce and PayPal payment providers.

Systems Developer

2014 - 2018

Making Waves (previously Nansen Inc.) - Chicago, IL

As a systems developer at Making Waves I have worked on many medium to large e-commerce websites for clients that range from motorcycle distribution companies to standards organizations. I've worked on international teams that relied heavily on communication, travelling to and working at headquarters in Oslo, Norway when necessary. I have also worked on projects directly with clients, sometimes on-site, from inception to completion.

Software Developer

2013 - 2014

NueMeta, LLC - Chicago, IL

Collaborated directly with the CEO and clients to build music distribution portals for music management companies and record labels to deliver their content to reputable streaming services and online marketplaces.

Open Source

Zorba The NoSQL Processor - zorba.io

Wrote installation and configuration instructions for Windows, Mac, and Linux. Created an OAuth 2.0 module for performing OAuth 2.0 authentication in XQuery through the Zorba processor.
